RECEIVED
AUG 08 2002
Technology Center 2600

Dear Sir:

In response to the Office Action mailed April 9, 2002, please amend the above-referenced application as follows:

In the Claims

Please amend claims 9 and 37 as follows:

9. (Amended) A method of enabling user interaction with computer software running in a computer system via:

an interface surface containing information relating to the computer software and including coded data indicative of an identity of the interface surface; and

a sensing device which, when placed in an operative position relative to the interface surface, senses indicating data indicative of the identity of the interface surface and generates movement data indicative of the sensing device's movement relative to the interface surface;

the method including the steps of, in the computer system:

(a) receiving the indicating data from the sensing device;
